NOTES

ABUS VITESSTM KEY CONTROL

ABUS Approach

The security of any locking system is dependent upon two very important factors. The first is protecting against attacks such as picking, drilling, bumping and forcing. The second is the ability to control duplication of existing keys. Historically, unauthorized key duplication has played a major role in compromising even the most sophisticated security systems. Anyone with even temporary access to original keys has no problem getting duplicates made for their own use if the keys and key blanks are not patent protected. Even stamping "Do Not Duplicate" on a key merely warns someone not to copy the key - it is not a promise of legal protection or enforcement. The only way to ensure that keys cannot be copied without the consent of the owner is a key system with patent protected keys.

ABUS VITESSTM KEY CONTROL LEVELS AND INITIAL INVESTMENTS

A Key Control Program That's Right for You

Level 1: Dealer Open Non-Exclusive Keyway

No minimum initial investment is required.

This program is designed for dealers to sell ABUS Vitess™ primarily for protection against picking, drilling and other forms of physical attack. Dealers can purchase products and keys from any ABUS authorized distributor. The distributor will issue the dealer a standard Vitess™ Security Card with unique embossed control data that the dealer will give to the owner of the system. To obtain duplicate keys, the owner of the system/customer needs to present the card to any participating ABUS Vitess™ locksmith. The data and signature will be verified and a key will be ordered from ABUS directly. Key blanks are not sold to dealers at this level.

Overview:

- Easy introduction to ABUS high security Vitess™ sales with **no investment** in stock
- Locksmith open keyway is the same keyway nationwide
- No sole source relationship with distributor or customers
- Keys cannot be duplicated at hardware stores or mall key stands
- ID cards are issued from the original locksmith

You'll be issued a customized Vitess™ Security Card with unique embossed control data and a space for end-user signature to authorize keys on this program. This security professional will have a signature card on file completed by the owner of the key system at the time the system was purchased. Custom coined keys are also required at this level that tie the customer to the Dealer for duplicate keys. Keys are duplicated immediately after the authorized signature on the card has been verified. Keys may only be duplicated by the locksmith where the locks were originally purchased.

End-user exclusive keyway is sold to the end user based on either a random assignment, regional or on a nationwide basis. The End-User program is for large facilities that have their own locksmith on staff and that want to produce ABUS Vitess™ keys themselves. This program offers individual control over key duplication procedures. The distributor or dealer who contracts with the End User is responsible for submitting the end user's signed forms with each order.
